PROBLEMS   SUBMISSIONS   USERS   CONTESTS   ABOUT   HELLO, **YAVORYANKOV83**.

✅ RecursionPath10 - Count X

Java May'19 DSA Recursion 1 - 2 days 13:36:40

Given a string, compute recursively (no loops) the number of lowercase 'x' chars in the string.

Input

On the first line you will be given a string

Output

On the only output line you should print the number of lowercase x in it.

Sample tests

Input

```
xxhixx
```
Copy

Output

```
4
```
Copy

Input

```
xhixhix
```
Copy
